Attachments: Consulting Services Proposal - Final 041312.pdf

Bob

Attached is our Consulting Proposal with our agreed upon revisions. Regarding Appendix I, the purpose of the Phase One work is to develop an exact list of equipment needed and sizing, shown as examples in Appendix I. We will need water analyses and flows to do our modeling and produce these recommendations. Appendix II is an example of the type of PFD that we will provide as part of the Phase One work.

Thanks for your time and help. We are looking forward to this project.

Gene

Gene, Alex,

As we discussed, the revised proposal answers my concerns about the original proposal. I did have a couple very minor comments on the revised proposal that you can see in the attached PDF. If you could pick these comments up I would appreciate it. I would also appreciate it if you could include a list of specific information you need for Appendix I – Water Chemistry and Water Balance Data and Appendix II, Process Flow Diagrams with the revised proposal.

Let me know if you have any questions.

Thanks.

Bob
